Marc,

We're amazingly busy doing PFAS stuff.

For the slides, I've attached a couple of recent PowerPoint presentations that summarize some of the latest stuff. Mark will be able to add more too.

It's looking like we will be coming to see you in early December.

There is a lot to talk about.

Thanks very much,

Andy

Subject: Two things

Andy and Mark

Two quick items. Aside from ... hope all is well.

First. I am providing an overview of PFAS research and tech support at ORD to NEWMOA on Thursday. I would like to include some of your current work as well. Can you send me 3-5 slides that overviews your research before Tues? I will send my slides as soon as I get them done.

Second, I wanted to follow up on the ORSANCO project that is coming together for PFAS. They are definitely interested in running some samples for GenX and short chain PFAS. I think we are looking at two sampling periods for high flow (April) and low flow (Sept/Oct) periods. If you have some time soon, let's set up a time to talk.

Sounds like we will be talking soon on some ORD coordination call too.

Thanks

Marc
